FOR THE SATURDAY EVENING POST. SABBATH MEDITATIONS.

The end and design of Religion is to lead man into a state of love and charity, and thus into conjunction with the Lord -for all conjunction with Heaven is effected by love. Faith is the principle that leads man to the knowledge and reception of Truth-and truth is the form or external manifestation of charity. Faith, therefore, is not the primary principle of the church, nor can it, alone, ever effect the salvation of the soul. For all the knowledge of truth that man can possibly possess, will never conjoin him with Heaven, if he be destitute of the higher and more holy rinciple of charity. The light of the sun without its heat, would be just as beneficial, as faith without charity.

Although charity is the more important principle, as a real good disposition is more important than a mere knowledge of what is good, yet much of its happy tendency and divine consolation is lost, if it be separated from faith; for without this enlightening guide it is apt to degenerate into enthusiasm; and, on the other hand, faith without its corresponding affection, is apt to settle into a cold and formal observance of external rites and ceremonies. Charity and faith, in the true christian, are inseparably united; and faith may be considered the first in respect to time, but charity the first in respect to end. The latter is consequently the superior principle; for the object in view is certainly superior to the means by which it is obtained. Charity prompts man to do good, and to act uprightly, from a pure love of goodness and uprightness, and faith points out how such benevolence and good will, is to be directed or performed, whilst the actual exercise of both, in the faithful discharge of duty, in every situation of life, constitutes good works, or the life of charity and faith. " What, therefore, God hath joined together, let not man put asunder." AMETHYST.

SINCERITY

which is good is likewise great; and consequently its fair sublimity renders it an object of endearment to those finer feelings implanted in our natures.

Sincerity is the firm foundation whereon truth rears her danntless front-it is the characteristic of a great soul, the indicator of real worth, and the shield of virtue: whereas insincerity is the parent and nurse of falsehood, the groveling support of mean actions, and the cloak of vice; and where is the man possessed of that dignity attached to an immortal soul, who is not sensible of this; or where the insincere who act with a noble consistency of character?

The more we practise sincerity, the more are we in love with it. Sincerity is a fair source of numerous and valuable virtuesdelightful are its paths, self approving its beavenly dictates, and all harmonious its attendant graces. Like the majestic oak that firmly scorns the hurricane, so doth sincerity scorn the creeping wiles and evasions of its enemies .- Sincerity is the parent of genuine liberty, and hence those glowing emotions that warm the patriot's sands of Ephesusand sulphur of Antimony, mixbreast. National and domestic affairs own their tranquility to love and sincerity; when them with propriety-But they who aim not to those virtues are uncultivated, alas! how deplorable the consequences! Sincerity retorts on itself, and like streams that overflow their banks, doth insincerity grovel in

a false channel. Where riches have disseminated a luxurious mode, little very little true candour is to be found. Commerce is too frequently tainted with duplicity; not that we wish to throw an odium on every merchant and tradesman; no! for there are amongst this respectable class of men, those who are ornaments in society, and an honour to human nature; yet it is amongst the swains we must expect to find the greatest proportion of true sincerity. Although the noble principle may be cultivated every where, yet rural solitude is best adapted to its steady diffusion -a diffusion mild as are the sun's departing ray, or splendid as his oriental vegetation. Since then sincerity is of so important a nature, and so valuable an acquisition, it behaves us to cherish this disposition, pregnant with happiness.

EFFICACY OF RELIGION.

Religion has planted itself, in all the purity of its image, and sufficiency of its strength at the threshold of human misery : and is empowered to recall the wanderers from their pilgrimage of woe and direct them in the path to heaven. It has diffused a sacred joy in the abodes of poverty and wretchedness: it has effaced the wrinkles from the brow of care-shed a gloom of sacred and tranquil joy in the chamber of death, gladdened the countenance of the dying with a triumphant enthusiasm, and diffused throughout the earth a faint foretaste of the blessings of futurity. It is benign as the light of heaven, and comprehensive as its span. An iris in the sky of the Christian it quickens perseverance with the promises of reward-reanimates the drooping spirit -invigorates the decrepitude of age-and directs with a prophetic ken, to the regions of eternal felicity .- Like the sun, it guides every object with its rays, without being diminished in its lustre, or shorn of

FOR THE SATURDAY EVENING POST. We are sometimes led into error and suffer ourselves to be imposed upon by others for the want of a little prudence in bringing things to the test of examination. It is, perhaps, owing to this than the fabulous notions of antiquity are some of them still cherished and believed in this enlightened age. The provident economy which the ancients ascribed to Ants is no doubt believed by many to exist: that these little insects industriously labor in summer to lay up a store for the consumption of winter. The scriptures make mention of these insects, and in the Proverbs of Solomon the sluggard is referred to them as an example of industry and economy. King Solomon, though he was said to be the wisest man that ever lived, had but very little leisure, perhaps, to bestow upon the investigation of the economy of pissmire hill, and unless the Ants of his day were very different from those of our times, they couldhave possessed no such fore sight and provident economy as is ascribed t hem. As often as any of the nests of these insects have come under my bservation, I have looked in vain for this property of hoarding; the conclusion is that it either neverbelonged to them, or other wise they have chaged entirely their habits in this respect. In winte, like most other insects they ie in their cells in a state of torpidity, requiring o sort of food, which in old times it was said their sagacity prompted tem to store up during summer. The activity ad industry of these little inects seems to be directed by Nature to the sole purpose of propagang their species. Filiments of grass, bits of stray, and skeletons of dead insects, which we ofte see them tugging and carrying along into their oles or burrows, seem to be used for no other proses than the construction Is in itself lovely, exalted, and endear- of cells for the depsit of their eggs. A female, by attending to her phiz and outward adornments, is led to neglect the mind-she spends all the days of her youth while she thinks herself charming and beautiful, at her toilette, and under the hands of the frizeur and milliner-As life strides on apace, she loses the power of Charming; and alas! possesses none to please herself, which can supply the place of flattery and pretended adoration. THE WANDERING JEW

[The following Fragment, translated by the late Percy Bysse Shelley from a German book, whose itle, says he, I have endeavoured to discover, appears to have furnished the germ of most of the fine things in Lord Byron's Manfred.]

Ahauserus, the Jew, crept from the dark cave of Mount Carmel. Nearly 2000 years had elapsed since he was first goaded by never-ending restlessness, to rove the globe from pole to pole. When our Saviour was wearied with the burden of his ponderous cross, and wanted to rest before the door of Ahasuerus, the unfeeling wretch drove him away with brutality. The Sa-viour of mankind staggered, sinking under the heavy load, but uttered no complaint. An angel of death appeared before Ahasucrus, and exclaimed indignantly, Barparian! thou has denied rest to the Son of Man; be it denied thee also, until he comes to judge the world.'

A black demon let loose from hell upon Ahasuerus, goads him now from country to country: he is denied the consolations which death affords, and precluded from

the rest of the peaceful grave. Ahasuerus crept forth from the dark cave of Mount Carmel. He shook the dust from his beard, and taking one of the skulls heaped there, hurled it down the eminence. It rebounded from the earth in shivered atoms. This was my father, roared Ahasuerus. Seven more skulls rolled down from rock to rock, while the infuriate Jew followed them with ghastly looks, exclaiming, 'And these were my wives!' He still continued to hurl down skull after skull, low as you are." roaring in dreadful accents- And these, and these, and these, were my children !-They could die; but I! reprobate wretch that I am, alas! I cannot die! Dreadful beyond conception is the judgment that hangs over me. Jerusalem fell .- I crushed the sucking babe, and precipitated myself into the destructive flames. I cursed the Romans-but alas! alas! the restless curse held me by the hair, and I could not die.-Rome the giantess fell-I placed myself before the falling statue—she fell and did not crush me. Nations sprung up and disappeared before me, but I remained, and did not die. From cloud encircled cliffs did I precipitate myself into the ocean; but the foaming billows cast me upon the shore, and the burning arrow of existence pierced my cold heart. I leaned into Etna's flaming abyss and roared with the giants for ten long months, polluting with my groans the Mount's sulphureous mouth. The volcano fermented, and in a fiery stream of lava cast me up. I lay down, torn by the torture of snakes of hell, amid

rom my body. The Saracen's flaming falchion broke upon my skull; balls in vain hissed over me; the lightnings of battle glared harmless around my loins; in vain did the elephant trample on me; in vain the iron hoof of the wrathful steed! The mine big with destructive power burst upon me and hurled me high in air. I fell on heaps of sm king limbs but was only singed. The giant's steel club rebounded from my body; the executioner's hand could not strangle me; the tigers tooth could not pierce me; nor would the hungry lion in the Circus devour me. I com. bated with poisonous snakes, and pinched the red crest of the dragon The serpent stung, but did not destroy me; the dragon. tormented, but dared not devour me. I now provoked the fury of tyrants .- I said to Nero, 'Thou art a bloodhound !' I said to Christiern, ' Thou art a bloodhound !' I said to Muley Ismael, 'Thou art a bloodhound!' The tyrants invented cruel tortures, but could not kill me. Hah! not be able to die-not be permitted to rest after the toils of life-to be doomed to be imprisoned for ever in this clay-formed dungeon-to be for ever clogged with this worthless body-its load of diseases and infirmities-to be condemned to hold for milleniums-that yawning monster Sameness, and Time-that hungry hyena ever bearing children, and ever devouring again her offspring! Hah! not be permitted to die! Awful avenger in Heaven, hast thou in thine armoury of wrath, a punishment more dreadful? then let it thunder upon me; and command a hurricane to sweep me down at the foot of Carmel, that I there may be extended; may pant, and writhe, and die!

Traits of distinguished Characters.

Dr. RADCLIFFE and Sir GODFREY KNELLER.

Dr. Radcliffe, the celebrated physician, and Sir Godfrey Kneller, the no less celebrated painter, possessed adjoining premises; and for mutual convenience they had opened a door in the wali which divided their gardens. Radcliffe's servants, however, having done some mischief in Sir Godfrey's garden, the latter sent to tell his friend that he should be under the absolute necessity of bricking crusty humour when the message was brought; and he returned for answer that Sir Godfrey might do what he liked with the door, so that he did not paint it. Kneller of course was a little nettled at this sarcasm; but he contented himself with coolly replying, " Well, well. I can take any thing of the worthy doctor but his physic."

LORD KAIMES.

Was " not very with himself, but the cause of wit in other men." Mr. Andrew B .lfour, the Scottish advocate, a man of considerable humor, accompanied by a great formatity of manners, happened to be one of a convivial party when his lordship was at the head of the table; after dinder he was asked to sing, but absolutely refused to comply with the pressing solicitations of the company At length lord Kaimes told him he should not escape, he must either sing a song, fell a story or drink a pint bumper. Mr. Balfout, being an absternious man, chose rather to tell the story than incur the forfeit. " One day," said he in his pompous manner, " a thief, in the course of his rounds, saw the door of a church invitingly open, he walk d in, thinking that even there he might lay nold of something useful. Having secured the pulpit cloth he was retreating, when lo! he found the door shut. After some consideration, he adopted the only means of escape left, namely, to let himself down by the bell which of course rang, the people were alarmed, and the thief was taken just as he had reached the ground. When they were dragging him away, he looked up, and emphatically addressed the bell, as I now address your lordship: " Had it not been," said he, " for your long tongue and your empty head, I had made my escape."

Two Negatives make a Positive. Mr. Pitt, was remarkable for giving his opinions with great positiveness. At a cabinet dinner, he was once expatiating on the beauty of the Latin language; and as an argument in favour of the superiority which he affirmed it had over the English, he said, that two negatives made a thing more positive, than one affirmative possibly could do .- " Ah! then, said lord Thurlow, your father and mother must have been two negatives, to have made such a positive fel-

BANEFUL SPIRIT OF WAR.

"The writers of the day have been loud in their invectives against Napoleon for the selfishness and utter disregard of life which be manifested in common with all lovers of war. Without seeking to extenuate his faults or eulogize his merits, we may observe, that he perhaps endeavoured to elevate himself above the rest of mankind by stifling all feelings which he partook in common with them. He affected to be a man apart from his fellow creatures, turning the passions of men to the completion of his own purposes, but himself beyond their control. Accordingly we do not hear that he wept at the bloody field of Borodina, or that he sympathized with the sufferers of Moscow. He looked upon these events with the cold eye of a political calculater, to whom the loss of an army was as an error in his arithmetical process. It would have been in better taste, no doubt, to have deplored the extinction of 300,000 fellowbeings in the horrible campaign of Russia, than to have exclaimed, while rubbing his hands over the fire on his way homewards, "this is pleasanter than Moscow." But Xerxes wept when viewing his immense army; he reflected that not one in such a multitude would survive a hundred years. And yet we do not find that Xerxes desisted from idle attempts to enslave Greece. In fact the kindthe glowing cinders, and yet continued to exist. A forest was on fire. Sporting Intelligence.

From the New York Evening Post, May 28. MATCH RACE-\$20,000 A SIDE

Yesterday the match race between Eclipse and southern horse called Henry, was run over the Union course. It will be recollected that the gentlemen from New York, while in attendance on the match race last fall at Washington city, between Eclipse and Sir Charles, offered to run the former this spring, on the Long Island course, for \$20,000 against any horse that could be produced in the United S ates or elsewhere, and gave the southern centlemen from that time, (November, 1822) to the time of starting, to look round and name their horse. The challenge was readily accepted, and \$3.000 fixed on as the sum to be forfeited in case ther party declined running the race. A number f horses were put in training for the occasion, but only two, viz: Henry and Betsey Richards, were brought on from the south, who it was judged could contend with Eclipse, and which of these two were to run the race, remained a secret, until the signal was given from the judges' box to bring up the horses, when Henry made his appearance, and Eclipse soon after. The doubts which had be ore been entertained, (and they were many,) that he southern sportsmen would pay forfeit and there would be no race, vanished at once, and all was anxiety to see the result of the contest. The hour of starting soon arrived, but such was the immense crowd upon the course in solid column, for near a quarter of a mile both right and left of the judges' box, that some minutes were taken up by the officers in clearing it; nor was it effected without much difficulty. About ten minutes after one P M. both horses set off at the tap of the drum; Hency taking the lead and keeping it the whole four miles, came in about half a length ahead.— Although several efforts were made by the ride o. Eclipse, a young man whose name we do not recollect, to pass his antagonist, still he could not secomplish it. The result of this heat was so different from what the northern sportsmen had calculated upon, that the mercury fell instantly be low the freezing point. Bets three to one that Estipse would lose the second heat were loudly offered, but there were few or no takers. Time of running the heat, 7 minutes 37 seconds.

Second Heat .- The time having elapsed for breathing, the horses were again brought up for the second heat, but it had been determined in the interim to change Eclipse's rider, as has often he erofore been done, and who should appear but our old friend Purdy,* who was welcomed with tumultuous cheers from the multitude. He soon mounted and at the word both went off. Henry took the lead, as in the first heat, and kept it until about two thirds round on the third mile, when Purdy, seiz d with a quickness and dexterity peculiar to himself, the favorable moment that pr senred, when by appearing to aim at the outside he might gain the inside, made a dash at him accordingly and passed him on the left; and main tained the ground he had gained to the end of the second heat, coming out about two lengths a head The air was now made to resound from every quarter, with Purdy forever! and as soon as he had been weighed the populace hore him off on their shoulders across the course, in spite of all the ntreaties he could make to the contrary. The mercury in the sporting thermometer immediately rose again to pleasant summer heat, and the back ers of Eclipse were now ready for any thing that ffered; they proposed to bet even but there were no takers. Several offers to draw were made by gentlemen who had bet on Henry, but not accepted. Confidence was again completely restored to the friends of Eclipse. Time of running this heat 7 minutes 49 seconds.

Third Heat .- When the horses were brought up for this heat, a jockey named Taylor, known many years on the Southern courses, for his g eat success, and whose skill was acknowledged be inferior to no one, made his appearance, when it was announced that he would ride Henry the 3d heat instead of the boy who had rode him the two former. The course once more cleared, off they went, Purdy taking the lead and keeping i to the end of the race, came in about three lengths ahead of his antagonist. The air was now rent with shouts of exstacy from the New Yorkers, and the press around the judges' stand for a short time was so great that nothing could overcome it. The whole course was blocked up in one solid mass of men, ten thousand deep, leaving no ground to being the horses to the stand so that the riders could be dismounted and weighed. Order however was at length restored, the riders were weigh ed, every thing found right, and Eclipse pronounced the victor. He was then marched off the field to the popular air of-" See, the conquering hero Thus has ended the greatest race that ever was run in this country.

favorite horse, Purdy burst into a flood of generous to Paris, after his return from the Isle of tears, and offered even then to redeem him if permitted. What was the cause of his not being engaged before, the sporting world are anxious to know. It is believed that had he been so, the third heat would not have been necessary to Eclipse.

A letter from Paris of the 18th March, relates the following remarkable story: - At Perpignan a few days ago, a Spanish refugee monk, of the army of the faith, entered a tavern where several French officers were seated. One of them, at sight of the monk, discovered great agitation, suddenly started from his seat, drew his sword and pursued the monk, with the evident intention of putting bim to death. He inflicted a severe wound on the ecclesiastic before he could be rescued from his fury. When questioned by the commanding officer respecting the cause of this violent conduct, he said, that during the last war, he had been taken he attacked the conduct of the Swiss prisoner by a party of guerillas, and that a sort of military council, at which this individual monk presided, had subsequently, condemned him to the horrible death of crucifixion, from which he was only preserved by the opportune approach of a party of French troops. The officer then exhibited one of his hands to show, by a scar which remained, that the dreadful work of torture had actually commenced. It was found necessary, in consequence of this explanation, to overlook the act of aggression committed on the monk."

The last Turkish army stationed on the North coast of the Gulf of Lepanto, commanded by Omer Pasha, has, by the last accounts we have received, been completely beaten near Minologli. We are obliged to decline publishing the sentiments of Erasmus, at present, under fear of being subjected to an interminable Theological controversy, which we have partly inadvertently been led into, and which has so increased on our hands, that we are compelled either to enter upon the subject much more largely than we had proposed, or to relinquish it altogether. Of these two courses we adopt the latter, believing that such a decision will be agreeable to the wishes of many of our readers. We feel the more inclined to this measure, as we have no sectarian views to advance, nor feel desirous of intruding the opinions of such upon our readers. Our religion teaches us " to live in bonds of Charity with all mankind"-and we believe that the principles of universal benevolence laid down in the sacred volume would be better served, if mankind generally were more liberal in examining the particular points of disbelief among professing Christians. Those who are pleased with a controversy of the nature alluded to will be amply gratified by reading the letters of PAUL and Amous just published. These interesting letters give a much more complete view of the subject, than the space we could devote to it would afford.

In answer to the note of Frigirius, we have o say, with all due humility, that we consider urselves the best judges of what ought to ap pear in our columns. We are anxious to please our subscribers individually, particularly when they happen to be correspondents, but we prefer general good to individual gratification.

Our files are crowded with effusions, "too nu merous to enumerate," of our friends: but we bope they will have patience with us, as they must perceive by our literary page, that we are making every exertion to give them to the world.

A very alarming fire occurred in this city on the afternoon of Wednesday, which originated in a stable back of the Bull's Head tavern, in Third street, above Callowhill, at present occupied by Mr. John Bleyer. The principal sufferers were James Hart and Conrad Weckerly. The fire extended itself through to St. John street, levelling in its way the intervening out-houses, and destroying a large range of stabling attached to the Black Bear Tavern Great difficulty in extinets were lodged in the trees, and scarce- guishing the fire was experienced on account of a part left standing. The adjoining the scarcity of water. A number of our active firemen, we regret to say, were injured by the falling of a part of the ruins.

" Allenton, Thompson's Island, May 11, 1823. We have just returned from a most fatiguing cruize, but I have not time to enter into all the details. It has resulted in the capture of the piratical schooner Pilot, and a felucca by the schoonerand barges under Captain Cassin-the burning of three piratical schooners (in consequence of on approach) by the pirates-the burni g by ou oats of one vessel on the stocks, and about dozen of houses in different piratical establish ments under the Collorado Reef, and the complete breaking up and dispersion of all the piratical gangs on this side of the Island. It is not believed hat a single pirate is to be found affoat between Point Yaocos and Cape Antonio; but the interior of the Island is much infested by them. Largbands of them were roving about the country near Matanzas when we were last there, plundering plantations and murdering the inhabitants A cot siderable body of Cavalry was sent out after them and brought in five prisoners. The M litia were also under arms and scouring the country.

The Pirates are well manned an i well armed and I think it lkely they will give the mhabitant of the I land much rouble; but as the evil is now brought home to them, I think the authornes w feel it incumbent on them to use every means in their power for their supp ession.

CAUTION .- Last Sunday evening about half past 8 o'clock, as a gentleman and lady were returning from visiting a friend in Market street above the Centre Square, when they arrived at the gate that leads into the Square, they found three men sitting on the gate, who showed no disposition to remove; the gentleman respectfully requested them to let him pass, when one of them jomped down and swore he should not go through, and struck him a violent blow on the head with a club, which cut a large hole in his hat, and cut his head. This blow would have felled him to the ground, but at the instant he was struck, another of them seized hold of him, no doubt with the intention to rob him-but the lady being alarmed, called murder, at which they made off. It is a little singular. that although murder was called, so early in the evening, so one came to their assistance. These ruffians were dressed in dark coats and white pantaloons. Twenty dollars will be paid for their apprebension and conviction.

From the Appendix to the Christian Observer. UNITED STATES.

The Government and Legislature of the United States, have continued to manifest the same anxious, desire to put an end to the Slave Trade which has always distinguished them.

Their cruisers on the African coast have well econded their wishes; and five slave ships detained on suspicion of being American property though disguised underforeign flags, had already been condemned in their Vice Admiralty Courts, previously to the month of January, 1821.

The pertinacity with which some of the sub ects of the United States still adhered to this infamous commerce, induced the American Legislature, as was stated in the introduction to the Supplementary Report of last year, to go a step beyond any other nation, even beyond Great Britain herself, in its measures of repression. An Act was passed, declaring the crime of slavetrading by American ships, or American subjects, to be piracy, and, as such, affixing to it the pun ishment of death.

Another important document had reached the Directors from the United States; the Report of a Committee of the House of Representatives, in the session of 1820 and 1821, relative to the mutual exercise of the right of search by Great Britain and America, with a view to the suppression of the Slave Trade. This Report contains a clear and decided opinion in favour of the exercise of such a right, as the only effectual means of suppressing the Slave Trade; while it demonstrates that its use involves no sacrifice of national inerest, nor any compromise of national honour. A correspondence which followed on this subject, between Mr. Stratford Canning, our ambassador at Washington, and the Secretary of State of the American Governments manifested a strong epuguance, on the part of that Government, to he measure recommended by the Committee .-This sentiment, however, appeared to be confin ed to the Executive; for, notwithstanding the arguments so recently urged by the American Secretary of State, a Report of the Senate of the United States, presented during the session of 1821-1822, concurred entirely in the view taken the year before, by the House of Representatives, and earnestly urged the adoption of the proposed expedient of a reciprocal right of search, as a nost desirable measure.

The report goes on to allude to various other opics, to a few only of which we can advert .-Several of them, indeed, have appeared before our readers in other shapes.

A treaty between Radama, King of Madagas car, and Mr. Farquhar, for the suppression of the Stave Trade in that island, had been carried into effect, and every attempt to elude its beneficent provisions had been defeated.

In the Isle of France, Governor Farguhar had exerted himself with great zeal, in endeavouring to suppress the Slave Trade within the limits of his own government; and the measures he has adopted, it was trusted, would prove effectual.

An Act had been passed, giving to the captors of slave-ships, a moiety of his Majesty's share of the prize, and a bounty of £.10 per head, on all Slaves liberated under the treaties with Spain, Portugal, and the Netherlands, and granting also the same bounties in some other cases not previously provided for by Act of Parliament. This salutary provision will both stimulate and reward the exertions of our cruizers.

The Directors express their concern, that when an important change was about to take place in the navigation laws of this country, as they affect the intercourse of the West India Colonies with foreign nations, it should not have been made substantive part of the measure, that an efficien and operative Register Act should be adopted b every colony to which the boon was to be extend ed. While the sugars of the West Indies are protected in their monopoly of the home market, by a high duty, not merely on foreign sugars, but on the sugars grown in our own East-Indian posses ns, thus giving a decided and exclusive pre ference to the produce of cultivation by slave labour, over that by free labour-the least that could be desired seemed to be, that no means should have been omitted of effectually preventing both the clandestine introduction of Slaves into our own colonies, and their clandestine remo al to the more productive colonies of foreign nations, according as temptations to the one or the other course might arise out of the train of

No less do the Directors regret the tardy progress of general impro-ement in the state of coonial bondage. More than fifteen years have elapsed since the Abolition of the Sla e Trade was enacted by the British Parliament; but duthan before received. Nothing new from the ring that long period, no effecti e measures have been adopted, either by the Imperial Legislature or by the Colonial Assembles, for ameliorating the condition of the Sla e, or paving the way to his future emancipation. In many of the colonies voluntary manumissions by the master still continue to be loaded with hea y imposts; and this cruel tax upon pri ate bene olence, pre ails e en in colonies where the crown is the sole legislator. In all, the Sla e continues absolutely inadmissible as a witness in any cause, whether ci il or criminal, which concerns persons of free condition; and e en in questions affecting his own personal freedom, and that of his posterity for e er, the onus still rests on him to prove that he is free, and not, as in all justice it ought to do, upon the person denying his freedom, to proce that he is a slate. In none is the marriage of the sla e made legal, or guarded by any legal sanctions; and with partial exceptions, his instructions in Christianity is left to the fortuitous efforts of voluntary missionaries. These are some of the opprobrious circumstances which continue to attach, with undiminished force, to our colonial system, and for which it is clearly the duty of this country to pro ide a remedy.

How different, or rather how opposite, in all particulars, is the scene exhibited to the world in all the provinces of Africa that are under the domion of the crown of France! While we cannot but feel confident, that what has been accomplished at Sierra Leone will have the effect of vindicating the much injured natives of Africa, from those imputations of inferiority to the rest of the species which have been so unjustly cast on them, we cannot also but indulge the hope, that, if our neigbours of France will not be influenced by a higher motive we shall surely shame them out of holding forth such humiliating and disgraceful contrast to the example of this country, as will be afforded by their still continuing to diffuse desolation and misery throughout that unhappy land.

A CURIOSITY.

MR. GIBBS, Lotte y Broker of this city, has been recently exhibiting in this state curious piece of mo-m, said to be the work of an Italian Artist. It con-of a box four inchez ong, three wide, and two deep-e gold. On one end is a suff cox-on the other a lid the good. On one can is a sour rok-on the ather a the ears and discloses an eight day time peace, which, besides riking the hours and quarters, plays a number of realitral ness. But the most wonderful part is, that on serting a ring, a ricture on the top of the lox ises slewly, and ecovers about ascending from below. The bird is about inch in Krank; of plumage the most lich, and yet the opt nature. It ings with stouishing sweeness, and according to the cost rature. ampanies its voi e with all those motions common to live bird - its head turns from side o side - its little lil ours, id its throat swells at every not, and its wings and tail oread and contract during the song. After repearing and riching its strain it drops upo, it gold n nest descens to s retreat, and the lid gently closes to its place, may 31-tf

ANHAT very prevalent misfortune, the loss o the upper front teeth induces the subscriber o believe that the following Communication upon he subject of decayed teeth, will be found deservng of an attentive perusal.

After the mortification in the upper front teeth has progressed inwardly for a considerable time, blackness appears between them outwardly, and the teeth are very liable to break off leaving the

stumps in the gums. When a tooth is first broken off, or for about wo or three years afterwards, a tooth can be fixed on its stump so firm as scarcely to be known from a natural tooth, and the pivot will answer the purpose of a plug, and prevent further decay in the tump; but if the stumps are neglected, the owner will lose the benefit of having teeth fixed in the mouth in the best way known, the way nearest to

Great advantages attends fixing teeth in the mouth on stumps, they never injure adjoining teeth, and in almost every instance are fixed in without pain, and when it is necessary to give pain. the Dentist can always inform beforehand, also, whether teeth can be fixed in, so as to be of real Thumb & Nob Latches. or lasting service, or not.

When one tooth in front breaks off, the inconve nience is not very great, and the stump is often neglected, but when more than one tooth breaks the inconvenience is truly serious, and the unfortunate person is sure to lament his great and irreparable misfortune that he did not know the importance of an early application to the Dentist, as by this time the stump of the tooth first broken, has become so carious as almost to preclude the possibility of fixing a tooth firmly upon it.

The teeth Williams furnishes are very strong and serviceable and do not lose their pivots, nor their colour, nor injure the breath, and only require to be seen to be approved.

Very many persons greatly suffer with decayed stumps in the back part of the mouth, they produce a bad breath, a bad taste in the mouth, are njurious to health, and destructive to adjoining eeth. Williams extracts the most difficult stumps with great safety and with so little pain as is sure to astonish every one-and continues to perform every operation in the line of his profession on his well known moderate terms.

Returning to England. JOHN OLDRIDGE, begs leave to acquaint his friends and the public, that on account of the great demand for the Balm of Columbia in Great Britain, and particular family affairs, he intends taking his departure, with his family, in a few months, from Philadelphia, and therefore thinks it his duty to inform his patrons, that it would be well for them to lay in a stock of his BALM for family use, as he does not intend to leave an Agent in the United States.

Its utility as a preventative for the falling off and restoring of bair is universally allowed and approved by thousands who have used, or seen it tried; therefore it is unnecessary to enter into a nearly colourless, and still retains its former virtues. It is prepared and sold, as usual, at his establishments No. 55½ South Front street, and at No. 11 North Fourth street, Philadelphia, at one dollar per bottle, and 50 cents for a half bottle. FOR THE SATURDAY EVENING POST. To Souvenir; qui le comprender When, by Winter fast retiring, Every storm is called away, How, our social bliss expiring, Seek we Spring's reviving ray. Warm'd by nature round us glowing, Beauty treads the spangled green, Like a sylph from heaven, bestowing Every blessing on the scene. O'er thy head the muse shall linger, Strewing roses fresh and fair, And the Spring with hallowed finger, Drops her pearly diamonds there. Lovely maid, in times departed, Far from seenes like this, of noise, Friendship, then, a charm imparted, Such as sorrow ne'er destroys, While my pensive eye is stealing, Where thy magic pen has strayed, I will call my manliest feeling,
